

Product images are mismatched with product names when logged in as 'problem\_user'.

#### Environment:

- **Browser:** [Google Chrome Version 126]
- **Operating System:** [Windows 11]
- **URL:** <https://www.saucedemo.com/inventory.html>

#### Steps to Reproduce:

1. Navigate to the login page at <https://www.saucedemo.com>.
2. Enter the username `problem_user`.
3. Enter the password `secret_sauce`.
4. Click the "Login" button.
5. Observe the product listings on the main inventory page.

**Expected Result:** Each product's image should correctly correspond to its title. For instance, the item named "Sauce Labs Backpack" should display an image of a backpack.

**Actual Result:** The product images are incorrect and do not match their titles. The item named "Sauce Labs Backpack" displays an image of the "Sauce Labs Fleece Jacket." This issue affects multiple items on the page.
